

Jeremy Ahamioje

Designer & Full-Stack Developer

EXPERIENCE

2023 — Present

Independent

Designer & Developer Freelance practice

Design and build interfaces end to end — research and art direction through to production front-end and the services behind it.

2022 — 2023

Remote

Full-Stack Developer

Shipped product surfaces against a design system, owning both the component layer and the API contracts feeding it.

2021 — 2022

Remote

Front-End Developer

Built responsive marketing and application front-ends with a focus on motion, accessibility and performance budgets.

DESIGN

- Art direction & visual identity
- Interface & interaction design
- Typography & design systems
- Prototyping & motion studies

DEVELOPMENT

- React, TypeScript, modern build tooling
- Creative development — WebGL, GSAP, Canvas
- Node APIs, data modelling, integrations
- Performance, accessibility, CI & deployment

TOOLKIT

Figma

React

Three.js

GSAP
